

Genetic improvement of traditional/local breeds

Peter Podgoršek, Slovenia, www.kis.si

Waael El-Desokey, Egypt

Ruta Švestiene, Lithuania

Rado Kasarda, Slovakia

Tamar Kartveleshvili, Georgia

Ivan Kyssa, Belorussia

Igor Stoković, Croatia

Ekatherine Tsurtsunia, Georgia

Peter Polák, Slovakia

Mariana Gladkich, Russia

Eduardas Gedauskas, Lithuania

Traditional/local breeds

- why traditional/local breeds?
 - ⊕ biodiversity
 - ⊕ traditional products
 - ⊕ environment
 - ⊕ sustainable
 - ⊕ traditional way of life
- traditional/local breeds vs. other breeds – competitiveness (product quality)
- characteristics of traits – environment or genetics?

Background

- ⊕ lack of info about traditional/local breeds
- ⊕ replacement of traditional/local breeds
- ⊕ poor/absent identification system
- ⊕ absence of data recording
- ⊕ advantageous traits

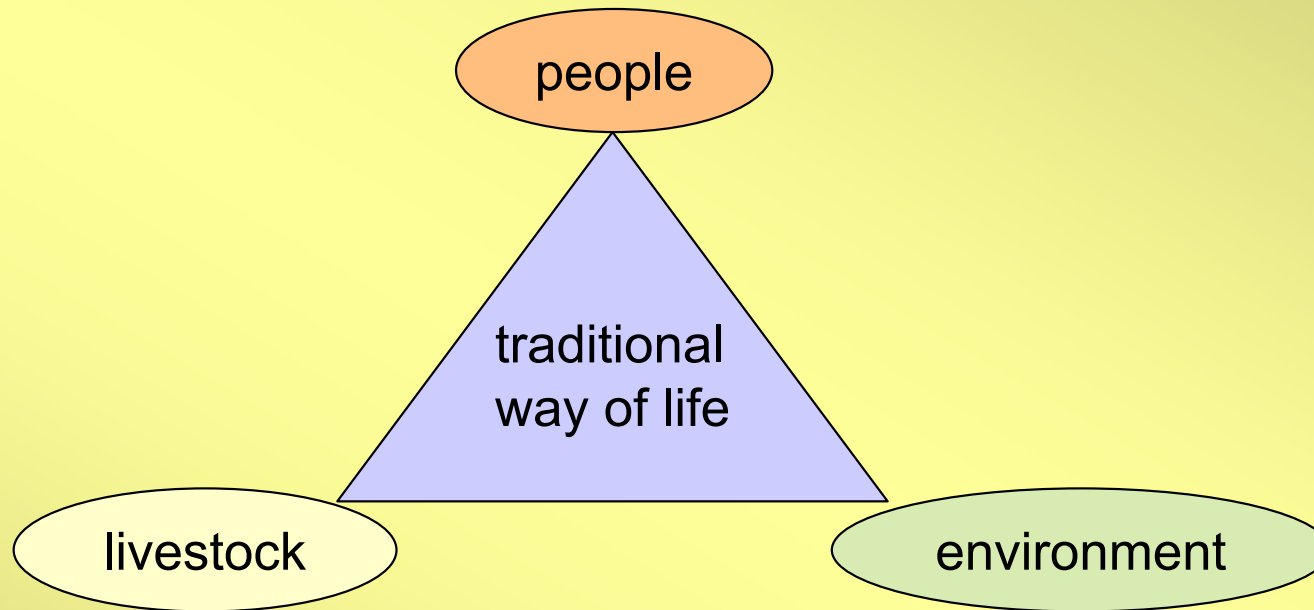

Challenges

- C&EE, MED and CIS
 - ⊕ establish animal identification system & animal database
 - ⊕ characterization of breeds
 - ⊕ develop breeding program
 - ⊕ survey consumer demands
- develop farmer support system – government, institutions, breeding organizations
- implement quality protocols in traditional production systems

Opportunities

- traditional production systems

- biodiversity – genetic potential
- product quality?

How to make it happen

- ⊕ establish functioning systems
- ⊕ breed characterisation (genetic potential)
- ⊕ design and implement breeding programs

Outcomes

- ⊕ use/preservation of traditional/local breeds
- ⊕ increased competitiveness
- ⊕ society awareness
- ⊕ keep rural areas productive

⊕ Interested?

⊕ Collaboration welcomed!!
